

Ethan John Walker

Developer with an eye for design.

I create unique applications and websites that push my creative and technical skills, utilizing problem solving and project management skills I learned from my alma mater and my persistent motivation to learn and improve. I am looking for teams who share my same passion and work with any **front end**, **back end**, and **full stack** technologies. I did **not** work as a stunt double for High School Musical 3.

🏠 EDUCATION

Winthrop University, Rock Hill, SC 2016–2020
Bachelor of Science in Computer Science
Minor in Digital Information Design
3.5 GPA (cum laude) and TRiO Winthrop branch member

<> AWARDS

2018 ACM International Collegiate Programming Contest Division II • 1st at College of Charleston, 4th in Southeast
Codepen.com • Several front-end creations featured on the homepage, totalling over 25k views
Bryan Pattison Endowed Scholarship recipient • Given to Winthrop's top-performing business students

🏠 EXPERIENCE

Unify 2019–2020
United Way, York County, SC

My team built a website using **HTML/CSS/JavaScript**, **Express.js**, **Node.js**, and **Material Components** to simplify applicant signup and form processing for United Way's Holiday Partners program which delivers gifts to under-privileged households over the holidays.

Currently Playing Display Summer 2019
currently-playing.inclushe.com

I created an open-source application using **HTML/CSS/JavaScript**, **Express.js**, **Node.js**, and **Vue** which shows song information and album art for the user's currently playing track on Spotify or Last.fm

Caps Lock Fall 2018
capslock.inclushe.com

I created a Twitter-like website where you can only post in all caps using **HTML/CSS/JavaScript** and **Express.js**.

Summer Camp Summer 2018
Technology Program Director
Westview Primary School, Goose Creek, SC

I taught children from grades 2 to 5 to create games and projects using **Scratch** and built a web application to teach basic **JavaScript** using a programmable LED strip.

Clock In Summer 2019
clock-in.inclushe.com

I created a boldly styled, full screen open-source clock application that has a timer, a stopwatch, a pomodoro timer, and an interval timer using **HTML/CSS/JavaScript**, **Express.js**, **Node.js**, and **Vue/Vuex/Vue Router**.
